WHY ?

Why Agile Project Management is Important?

In a fast-paced world, projects often face constant changes and uncertainty. Agile project management provides the flexibility to adapt quickly, ensuring teams deliver value in smaller increments while responding to evolving needs. Agile empowers leaders to navigate challenges, keep stakeholders engaged, and achieve success amidst complexity.

How Agile Certification Help in Career Growth?

Agile certification sets you apart in today's competitive job market, showcasing your ability to lead adaptive teams and deliver results in dynamic environments. It opens doors to high-demand roles like Scrum Master or Agile Coach, validates your expertise in Agile practices, and positions you as a trusted leader driving innovation and success across industries.

HOW ?

WHAT ?

What is the path of becoming a PMI-ACP® Certified?

Becoming PMI-ACP® certified requires mastering Agile principles and practices through a structured approach. Join our Certified Agile Practitioner workshop to develop practical Agile skills. Practice PMI-ACP® questions aligned with the Exam Content Outline, excel with our success-guarantee simulator, and confidently achieve PMI-ACP® certification with our proven success guarantee.

What you Will Learn?

Agile Project Management goes beyond short iterations and daily standups—it's about delivering customer value through continuous feedback and improvement. The Certified Agile Practitioner workshop empowers you to embrace an Agile mindset, lead high-performing Agile teams, design customer-centric products, and deliver value incrementally, ensuring success in dynamic and evolving environments.

Engagement Model

Content — Interactive and informative sessions based on cutting edge research with practical scenarios
Context — Collaborative coaching to help you identify relevant issues and applying content to your situation

Competence — Experience experiential learning to map the competency requirements in a given context

WORKSHOP BENEFITS

ADAPT
Quickly to Change

BOOST
Team Collaboration

CULTIVATE

COURSE OUTLINE

SESSION 1

Introduction to Agile

This session will cover

- **Understand** Organization Challenges
- **Differentiate** Organization Projects
- **Discuss** Agile Project Management
- **Activity**: Growth Initiatives

This session will discuss transformation challenges and their solutions. Participants will be able to identify and link projects for organizational growth.

SESSION 2

Embrace Agile Mindset

This session will cover

- **Discuss** Agile Mindset & Manifesto
- **Understand** Agile Principles
- **Define** Agile Process
- **Activity**: Differentiate Agile Roles

This session will discuss transformation challenges and their solutions. Participants will be able to identify and link projects for organizational growth.

SESSION 3

Initiate Agile Project

This session will cover

- **Discuss** Project Initiation Activities
- **Understand** Agile Practices
- **Document** Agile Charter
- **Activity**: Elevator Pitch

This session will discuss the agile mindset with the agile manifesto and values. The participants will be able to define the agile process with key events, and artifacts.

SESSION 4

Setup Collaborative Environment

This session will cover

- **Discuss** Team Vision & Working Environment
- **Understand** Psychological Safety
- **Define** Agile Transparency
- **Activity**: Agile Approach

This session will discuss the project team's needs in an agile project. Participants will assess the product complexity and the organization's readiness to design an agile approach for the project.

COURSE OUTLINE

SESSION 5

Define Product Backlog	This session will cover	This session will guide participants in utilizing system thinking to understand the product. Participants will define product value by documenting user stories.
	• **Understand** System Thinking • **Differentiate** Feature, Story, Use Case • **Measure** Delivery of Value • **Activity**: Value Story	

SESSION 6

Estimate Agile Project	This session will cover	This session will discuss and differentiate estimation types and techniques. Participants can estimate user stories and plan iterations and releases for an agile project.
	• Differentiate Estimation Techniques • Calculate Team Velocity • Develop Story Map • **Activity:** Release and Iteration Estimation	

SESSION 7

Refine Product Backlog	This session will cover	This session will guide participants in utilizing design thinking to understand customer needs. Participants will practice tools to decompose and prioritize product scope.
	• **Understand** Design Thinking • **Decompose** Product Scope • **Prioritize** Product Scope • **Activity:** Product Backlog	

SESSION 8

Manage Impediments and Risks	This session will cover	This session will guide participants in understanding agile risks and planning their mitigations. Participants will perform role plays to resolve problems and manage conflicts.
	• **Understand** Agile Risks & Mitigation • **Facilitate** Problem Resolution • **Facilitate** Conflict Management • **Activity:** Risk Adjusted Backlog	

COURSE OUTLINE

SESSION 9

Manage Change

This session will cover

- **Evaluate** Customer Satisfaction
- **Promote** Growth Mindset
- **Apply** Emotional Intelligence
- **Activity:** Prioritized Backlog

This session will guide participants to understand change management in agile projects. Participants will be able to practice team engagement during the change process.

SESSION 10

Measure Product Performance

This session will cover

- **Discuss** Agile Metrics
- **Track** Release Status
- **Track** Team Velocity
- **Activity:** Burnup & Burndown Charts

This session will discuss agile team performance during iteration and release. Participants will be able to develop burndown and burnup charts for multiple scenarios.

SESSION 11

Measure Process Performance

This session will cover

- **Discuss** Agile Retrospectives
- **Visualize** Work flow
- **Practice** Process Improvement
- **Activity:** Kanban Board

This session will discuss agile retrospectives and the role of agile teams in that meeting. Participants will be able to plan and measure process metrics.

SESSION 12

Attempt Agile Certification

This session will cover

- **TEST**: Certified Agile Practitioner
- 100 Questions in 2 hours

This session will help participants to apply their knowledge and skills in various scenarios to become Certified Agile Practitioner.
