

# CERTIFIED AGILE PRACTITIONER

*MASTER AGILE LEADERSHIP TO DRIVE INNOVATION AND ADAPTABILITY*

Experience the Execution of Agile Projects  
through Case Studies

## WHY ?

### Why Agile Project Management is Important?

In a fast-paced world, projects often face constant changes and uncertainty. Agile project management provides the flexibility to adapt quickly, ensuring teams deliver value in smaller increments while responding to evolving needs. Agile empowers leaders to navigate challenges, keep stakeholders engaged, and achieve success amidst complexity.

### How Agile Certification Help in Career Growth?

Agile certification sets you apart in today's competitive job market, showcasing your ability to lead adaptive teams and deliver results in dynamic environments. It opens doors to high-demand roles like Scrum Master or Agile Coach, validates your expertise in Agile practices, and positions you as a trusted leader driving innovation and success across industries.

## HOW ?

### What is the path of becoming a PMI-ACP® Certified?

Becoming PMI-ACP® certified requires mastering Agile principles and practices through a structured approach. Join our Certified Agile Practitioner workshop to develop practical Agile skills. Practice PMI-ACP® questions aligned with the Exam Content Outline, excel with our success-guarantee simulator, and confidently achieve PMI-ACP® certification with our proven success guarantee.

## WHAT ?

# What you Will Learn?

Agile Project Management goes beyond short iterations and daily standups—it's about delivering customer value through continuous feedback and improvement. The Certified Agile Practitioner workshop empowers you to embrace an Agile mindset, lead high-performing Agile teams, design customer-centric products, and deliver value incrementally, ensuring success in dynamic and evolving environments.

## Engagement Model

### Content

Interactive and informative sessions based on cutting edge research with practical scenarios

### Context

Collaborative coaching to help you identify relevant issues and applying content to your situation

### Competence

Experience experiential learning to map the competency requirements in a given context

## WORKSHOP BENEFITS

### ADAPT

Quickly to Change

### BOOST

Team Collaboration

### CULTIVATE

Customer-Centric Solutions

### DELIVER

Incremental Value

### ENHANCE

Predictability in Planning

### FOSTER

Stakeholder Engagement

### GROW

High-Performing Teams

### HARNESS

Feedback for Improvement

### INNOVATE

Through Iterative Processes

### JOIN

the Agile Leadership Community

## FOUR STEPS TO AGILE SUCCESS

**A**

Attend **2 Days Agile Project Management** Workshop to Experience Agile Project Management **Cases**

**B**

Practice **Question** and **Answers** with Key **Scenarios**

**C**

Pass **AUC** Certified **Agile Practitioner** Exam (2 Attempts)

**D**

Attempt **PMI-ACP®** Exam with our **Success Guarantee**

## PDU breakdown

This course will help you to qualify for PMI-ACP® 28 contact Hours Requirement. If you are PMP® certified it will give you 30 PDUs for PMP maintenance.

----------------------	--	---

### SESSION 10

<b>Measure Product Performance</b>	<p><b>This session will cover</b></p> <ul style="list-style-type: none"><li>• <b>Discuss</b> Agile Metrics</li><li>• <b>Track</b> Release Status</li><li>• <b>Track</b> Team Velocity</li><li>• <b>Activity:</b> Burnup &amp; Burndown Charts</li></ul>	<p>This session will discuss agile team performance during iteration and release. Participants will be able to develop burndown and burnup charts for multiple scenarios.</p>
------------------------------------	---	---

### SESSION 11

<b>Measure Process Performance</b>	<p><b>This session will cover</b></p> <ul style="list-style-type: none"><li>• <b>Discuss</b> Agile Retrospectives</li><li>• <b>Visualize</b> Work flow</li><li>• <b>Practice</b> Process Improvement</li><li>• <b>Activity:</b> Kanban Board</li></ul>	<p>This session will discuss agile retrospectives and the role of agile teams in that meeting. Participants will be able to plan and measure process metrics.</p>
------------------------------------	--	---

### SESSION 12

<b>Close Agile Projects</b>	<p><b>This session will cover</b></p> <ul style="list-style-type: none"><li>• Discuss Closing Scenarios</li><li>• Understand Agile Project Transition</li><li>• Finalize Lesson Learned</li><li>• <b>Activity:</b> Lesson Learned Document</li></ul>	<p>This session will help participants to understand agile project closing scenarios. Participants will be able to document lesson learned for their projects.</p>
-----------------------------	--	--

# ABOUT ASAD ULLAH CHAUDHRY

Asad Ullah Chaudhry is an **Oxford** Graduate, Masters from **Stanford** University, and long term **PgMP®**, **PMP®**, and **ACP®** practitioner.

He runs a project-focused consultancy and training company, **AUC Technologies (Pvt.) Ltd**; an innovative company: coaching more than a score of organizations. Asad possesses diversified experience in Strategic Management, Portfolio Management, Change Management, Information Technology, Business Process Redesign, and Innovation Management. He has a particular and cherished association with Project Management.

Asad, is working with organizations to align **Strategies** with **initiatives**, Portfolio Management, Project and Program Management Office (**PMO**) Setup, Technology Evaluation, and Project Implementations. He has successfully worked on initiatives, including: Corporate Startup for **Jaffer Group**, setting up Portfolio Management Office in Pakistan **Air Force**, Implementing Project Management Office in **Meezan** Bank, ERP Project Implementation for **Burque** Corporation, ERP Project Planning and PMO Setup for **Pakistan Army**, Core Banking Project Implementation and PMO Setup for **National** Bank of Pakistan, PMO Setup for **Jaffer Brothers**, PMO setup for **Kalsoft**, and PMO Setup for **Emmaculate**.

As a facilitator, he has more than **450** events to his credit in four continent, the Americas, Europe, Africa and Asia. He has trained **25000+** individuals in technology, project management and entrepreneurship area. He regularly volunteers his time for promoting technology, management, and entrepreneurship. He is a **President** of Sir Syed University Alumni Association (Regd.). He served as board member of PMI Karachi Chapter. He worked with **Microsoft Pakistan** for Imagine Cup Entrepreneurship challenge. He also contributed to **PMI's** Standards for Portfolio and Program Management.

Over my **20** years of training experience, working with over **25,000** professionals across **1,000+** companies in **30+** countries, I've witnessed a recurring dilemma: professionals unsure of which Agile certification to pursue—**PMI-ACP®**, **Scrum Master**, or something else. The result? Many invest time and resources without aligning their credentials with their career goals.

Here's the reality: PMI has evolved the **PMP®** certification to include **Agile** content, making it a comprehensive global credential. **PMP®** now equips Professionals with Predictive and Agile knowledge, recognized universally across industries. But many still feel the pressure to chase multiple certifications, believing that's the only way to demonstrate **Agile expertise**.

I believe there's a smarter way. If you hold—or are pursuing—the globally recognized **PMP®** certification, you already have a foundation that showcases your ability to manage projects in any environment. My **Certified Agile Practitioner** workshop is designed to complement **PMP®**, giving you the practical Agile skills and **mindset** that bridge theory and real-world application. Together, they create a powerful combination that positions you as a **versatile leader** ready to tackle today's dynamic challenges.

Sure, **PMI-ACP®** and **Scrum Master** certifications have their place—especially if an employer specifically requires them. However, for most professionals, the **PMP's** global recognition, combined with my Agile workshop's practical expertise, delivers a stronger, broader, and more impactful credential for career growth.

My approach is simple: maximize the value of your **PMP®** by complementing it with practical Agile training. As someone who has trained thousands of professionals globally, I understand what the market demands and how to position you for success.

If you want a credential that's global, versatile, and future-proof, the combination of **PMP®** and my **Certified Agile Practitioner** certificate is the way forward.

---

## VISION

Our Vision is to be the global provider of change agents.

---

## MISSION

Our Mission is to educate, engage, and inspire people globally to enable their potential for growth.
