PROJECT MANAGEMENT WITH PMP® EXAM PREPARATION

The Missing Piece in Your PMP® Preparation

Not more slides. A way of thinking you will use long after the exam.

NEXT COHORT

13–15 November 2026

The Exam Changed. So Did the Job.

PMI rebuilt the 2026 PMP® exam around judgment. Employers want the same thing: project managers who think like business leaders.

26%	180	3
Business Environment questions, up from 8%	situational questions in 240 minutes	ways of working, tested together

WHAT MOST PMP® PREP GIVES YOU	WHAT THE EXAM AND YOUR EMPLOYER ASK FOR
Memorized processes, inputs and outputs	**Judgment in situations you have never seen**
Predictive and agile taught as separate subjects	**Choosing and blending the right approach**
One practice score: pass or fail	**Knowing exactly which skills to strengthen**
A certificate	**A way of leading that lasts**

So what is the missing piece? Turn the page →

The Missing Piece Is How You Think.

The AUC Five-Lens Method trains the five ways of thinking that leaders use and the exam rewards, across all three sides of PMI's Talent Triangle.

Built by **Asad Ullah Chaudhry** from 25 years of practice and 10,000+ PMP® participants since 2004.

BY THE END OF THE PROGRAM, YOU WILL BE ABLE TO

Strategic

Why does this project exist?

Link every project to strategy, value and benefits, and defend it in a business case.

Systems

How does each part affect the others?

Read the organization, its governance and its stakeholders, and plan communication that moves them.

Critical

What is the evidence, and the best option?

Choose the right life cycle, and make sound calls on scope, schedule, cost, risk and change.

Design

What do people really need?

Shape the MVP, the backlog and each release around users and value.

Reflective

What did we learn?

Lead teams through conflict and feedback, and turn every lesson into improvement.

Thinking grows only with practice. So you won't just study projects. You'll practice on three. →

Three Projects. Every Way of Working.

Every participant completes hands-on activities, some AI-assisted, and real project templates for each type of project: predictive, hybrid and adaptive. Tools are practiced on real project decisions, the way the exam presents them.

PREDICTIVE

Project Blue

Solar farm

A fixed site, fixed permits and a fixed grid-connection date. You practice the WBS, critical path, cost baseline and risk register, and how to control change when weather and suppliers do not cooperate.

HYBRID

Project Green

Car-plant automation

Robotic cells installed to a plan, software released in sprints. You practice integrating a predictive hardware stream with agile delivery, and managing the stakeholders caught between them.

ADAPTIVE

Project Red

AI-driven learning app

Uncertain users and fast-moving technology. You practice shaping the MVP, sizing the backlog, planning releases and leading a self-organizing team through feedback.

THE LEARNING EXPERIENCE

A workbook you complete in class

Printed frameworks with room for your own decisions, so you leave with a record of how you think.

Exam scenarios, discussed not memorized

Real PMI-style situations in every module, debated at your table before the answer is revealed.

Decisions made as a team

Negotiate, resolve conflict and lead change with peers, the power skills the exam now weighs.

Progress you can see

A short check after each module shows what you have mastered and what to practice next.

Here is the map, module by module →

Nine Modules. Five Lenses. Three Days.

Each module covers its share of the 2026 Exam Content Outline, led by one or more lenses.

MODULE 01

Explore the Evolution of Project Management & PMP®

All five lenses

- The history of the profession
- The 2026 exam and its domains
- The five thinking lenses
- Eligibility and application

MODULE 02

Transform Organizational Challenges into Projects

Strategic

- Vision, mission and strategy
- Portfolio selection and business case
- Value and benefits
- The project charter

MODULE 03

Navigate Power Dynamics

Systems

- The organization as a system
- Governance and the PMO
- Stakeholder engagement
- Communication planning

MODULE 04

Design Project Life Cycles

Critical

- Predictive, adaptive, hybrid
- Assessing complexity
- Tailoring the approach
- Choosing the development approach

MODULE 05

Plan Predictive Projects

Systems · Design · Critical

- Scope and the WBS
- Schedule and critical path
- Estimates and the cost baseline
- Quality, procurement and risk

MODULE 06

Proactively Manage Predictive Projects

Systems · Critical

- Integrated change control
- Earned value management
- Risk and quality control
- Status and reporting

MODULE 07

Plan Adaptive Projects

Design

- The MVP and product vision
- Backlog and user stories
- Release and iteration planning
- Agile estimating

MODULE 08

Iteratively Deliver Adaptive Projects

Reflective

- Servant leadership
- Conflict and team dynamics
- Burndown, velocity, impediments
- Retrospectives

MODULE 09

Transition Project Results

Strategic · Reflective

- Acceptance and handover
- Procurement and financial closure
- Benefits realization
- Lessons learned

So how will you know you are ready? →

You Will See Your Own Before and After.

90%+

pass on the first attempt since 2020, and 100% by the second

Tracked systematically since 2020, and in line with the results graduates have reported to us since 2004. No stock photos, no invented numbers: every face below is a real AUC graduate.

AUC Certified · Full list with LinkedIn profiles: auctechnologies.com/PMP-Certified-Professionals

HOW YOUR READINESS IS MEASURED

BEFORE THE COURSE

Baseline

40 questions show what you already know.

DURING THE COURSE

Module checks

60 questions linked to your baseline.

END OF THE COURSE

Timed final

50 questions in 60 minutes.

AFTER THE COURSE

Your roadmap

A personal plan and exam window.

> *With "Above Target" ratings across all three domains – People, Process, and Business Environment... My journey to success wouldn't have been possible without the incredible guidance of my teacher: Asad Ullah Chaudhry.*

Hamza Bin Masood, PMP® · Deputy Manager Mechanical, Engineering and Projects

FROM LINKEDIN

> *Special thanks to Asad Ullah Chaudhry for delivering an engaging and insightful training session. Grateful for the opportunity to enhance my project management skills and looking forward to applying these valuable insights.*

Syed Hassan Abbas, PMP® · Manager Quality Control and Project HSE

FROM LINKEDIN

Who will guide you there? →

A Transformation Leader. Not a Presenter.

Transforming people, organizations and nations since 2001.

Asad Ullah Chaudhry

PgMP® · PMP® · PMI-ACP® · CERTIFIED SCRUMMASTER

Asad Ullah Chaudhry is a transformation leader with 25 years of practice. He began by training technologists, went on to lead projects, programs and PMOs for banks, the armed forces and government, and today leads a private equity portfolio as CEO of Ashrei Tech while advising on Pakistan's national digital initiatives.

In his classes, participants lead their own real projects, coached by someone who has delivered them.

1 · PEOPLE

25,000+

professionals trained in 25 years, including 10,000+ PMP® participants since 2004

2 · ORGANIZATIONS

1,000+

live projects coached in 196 corporate programs for 65 companies, and 12+ organizations advised on project, program and portfolio management

3 · NATION

10+

national and government institutions across Pakistan, the UAE and Saudi Arabia, including the Pakistan Digital Authority, State Bank, National Bank, HEC, the Army, the Air Force and Red Sea Global

EDUCATION

Master's in Major Programme Management, University of Oxford

Master Certificate, Design Thinking and the Art of Innovation, Stanford University

Master Certificate in Leadership, PMI Leadership Institute

PROFESSION

Development contributor, PMI Standard for Program Management (5th ed.) and Standard for Portfolio Management (2nd ed.)

Founding member and former board member, PMI Karachi Chapter

20+ INDUSTRIES SERVED

Automotive · Banking · Construction · Defense · Energy · FMCG · Government · Healthcare · IT · Manufacturing …

Your seat is waiting. →

Reserve Your Seat

Pass the exam. Lead the work. Become the leader your organization needs.

CONTACT HOURS

35

For your PMI application, or 35 PDUs

EVERYTHING INCLUDED IN $399

- ✓ 3-day live workshop, workbook and case projects
- ✓ Full recorded course to watch online afterwards
- ✓ AUC exam simulator and 5-day practice plan
- ✓ Readiness tests and your personal roadmap
- ✓ PMI application support

YOUR FEE

$399

with 3 Months Success Guarantee

QUESTIONS PEOPLE ASK

Am I eligible?

We check on a short call, then help with your PMI application.

Predictive or agile?

Both, and hybrid, as the exam tests them.

What does the guarantee cover?

Sit the exam within 3 months of the course. If you don't pass, AUC pays your second-attempt fee.

Can I review later?

Yes: the full recorded course, plus Breathless PMP® in 60 minutes.
